

## **Project Aim, Objectives and Outcomes**

### **Project Aim**

Use this section to clearly describe the overall aim of your Independent Project.

Your aim may be a question you want to explore, a goal you want to achieve, or a skill you want to develop.

Good aims are clear, purposeful, and focused on learning or development.

#### **Examples:**

- I want to learn how to make candles and understand the science behind the process.
- I want to design and build a skateboard ramp and learn how to use it safely.
- I want to learn to scuba dive and understand the training, equipment, and safety involved.

#### **Aim:**

---

### **Project Objectives**

Your objectives are the steps you will take to achieve your aim.

Think about what you will need to research, practise, create, or organise in order to reach your goal.

Objectives should be practical and achievable.

#### **Examples:**

- Research the chemistry of candle making
- Gather equipment and materials
- Complete a risk assessment
- Learn and practise candle-making techniques
- Create a small online business to sell finished products

#### **Objectives:**

- - 
  -
-

## **Project Outcomes**

Your outcomes describe the final results of your project.

They should be specific, measurable, achievable, relevant, and time-based, and show what you have produced or achieved by the end of the project.

### **Examples:**

- A completed stock of candles ready for sale
- Evidence of income from online sales
- A booklet explaining the candle-making process, including photographs of each stage

### **Outcomes:**

- 
- 
- 

---

## **Project Title**

Give your project a working title. This can be refined or changed as your project develops.
